

VOLUME CONTROL SYSTEMS

VOLUME CONTROL UNIT WITH TRANSFORMER

The cross section of the cables connecting the volume control with the power amplifier and with the speaker must be 2 x 0,75 mm² LICY or 2 x 0,50 mm² LICY.

This product is designed for use in systems where the broadcasting centre has an output voltage of 50 V, 70 V or 100 V.

The Volume Control Unit can adjust the volume in accordance with the unlimited turn principle.
